

— PRACTICE

**The AI premium in
AEC isn't technical.
It's judgment.**

SWIPE ►

— WHAT AI ABSORBS

First-pass work moves fast now

Drafting, redlines, and submittal sorting are exactly the tasks AI tools handle well today.

— WHAT DOESN'T MOVE

Deciding what the output means

Someone still has to decide whether a result is right, relevant, and ready for a client or a stamp.

— THE REAL SKILL

Judgment gets more visible, not less

As production work shrinks, the decisions built on top of it become the harder, higher-value part of the job.

— A E C E N T R I C

Build judgment on purpose

Treat it like any other core skill: real projects, real review, real feedback, not something that develops on its own.

Full breakdown at the link in bio.
