

— PRACTICE

**You bought
enterprise
licenses. Now
what?**

SWIPE ►

— FIRST 30 DAYS

Week one: pick the workflow

Name one repeatable task your team already does every week. Firm wide enthusiasm is not a rollout plan.

Week two: load your standards

Give the tool your terminology, templates, and approved examples so its first drafts start in your firm's voice instead of a generic one.

— FIRST 30 DAYS

Weeks three and four: measure

Track hours on that one task before and after. A number beats a survey when you go back to leadership for the next phase.

— A E C E N T R I C

Licenses are the start, not the rollout

Firms that see real results treat the first month as structured onboarding, not a free for all with logins.
