

— PRACTICE

**The first AI
workflow to pilot is
the one nobody
will miss**

SWIPE ►

— GOOD FIRST PICK

Meeting minutes and action logs

Work everyone does every week, that nobody is attached to, and that no stamp depends on.

— GOOD FIRST PICK

RFI log summaries and status reports

Repetitive, low stakes, and already reviewed by someone before it reaches a client.

— WHY IT WORKS

You build the habit before the risk

The team learns to check AI output on something safe, before AI ever touches work that carries your stamp.

— A E C E N T R I C

Skip the instinct to start big

The most valuable task is rarely the right first pilot. Start where a mistake costs nothing and the review habit can form.

Full breakdown at the link in bio.
