INDUSTRY RESEARCH

On AI and robotics: 51 percent positive, 8 percent negative

SWIPE

WHAT THE SURVEY FOUND

Net positive, not settled: 21 percent mixed

Of the 775 contractors who answered this question, 51 percent expect AI and robotics to have a somewhat or very positive impact on the construction industry over the next five years, 8 percent expect a somewhat or very negative one, and 21 percent expect the impact to be mixed. Source: AGC of America and NCCER, 2026 Workforce Survey, published September 3, 2026. 775 of 1,830 respondents, fielded July and August 2026.

AECENTRIC

Pick one workflow, measure it for a quarter

A fifth of the contractors surveyed are openly undecided, so there is no rush to copy whatever a competitor announced. Pick one workflow, agree on how you will measure it before you start, and run it for a quarter. We help firms choose that workflow and set the measure.
