

— PRACTICE

**AI adoption starts
with an audit, not
a tool purchase**

SWIPE ►

— WHAT WE CHECK

Your data

Is it structured enough to actually feed an AI workflow, or scattered across formats no tool can use yet.

— WHAT WE CHECK

Your tools

What's already in your stack, what it's built for, and where it stops helping.

— WHAT WE CHECK

Your teams

Who will use this day to day, and what it would take for them to trust it enough to rely on it.

— A E C E N T R I C

Skip the pilot, run the audit first

A readiness assessment tells you where AI pays off before you spend a dollar on a tool.
