INDUSTRY RESEARCH

61 percent of firms use AI. About one worker in six touches it.

SWIPE

THE NUMBERS

Adoption is wide. Inside the firm it is thin.

In the New York Fed's August 2026 surveys of New York and Northern New Jersey, 61 percent of service firms and 51 percent of manufacturers said they used AI in their business processes in the past six months, up from 40 and 26 a year earlier. Among firms that use it, the median share of workers using it was 17 percent at service firms and 7 percent at manufacturers. Only 15 percent of service firms had committed significant resources. Source: New York Fed, Liberty Street Economics, September 1, 2026.

AECENTRIC

Count real use before you count yourself behind

This is one Fed district, service firms and manufacturers, with no construction or design breakdown. Treat it as a baseline. Two questions tell you more than the 61 percent: what share of your staff use AI on real work each week, and have you funded it. We help AEC firms get an honest count first.
