

— HIRING

**AI fluency is
becoming a hiring
signal, not a
courtesy line on a
resume**

SWIPE ►

— THE OLD SIGNAL

Has used a chatbot

Not much of a filter anymore. Almost everyone has opened one by now.

— THE NEW SIGNAL

Can direct it and catch it

Whether someone can run a real task through an AI tool and knows when the output is wrong.

— BUILD IT ON PURPOSE

Fluency does not develop on its own

Firms that train for it project by project are pulling ahead of firms waiting for it to happen organically.

— A E C E N T R I C

Ask this in your next interview

Have a candidate walk you through a real task they used AI on, not just whether they have used it.

Full breakdown at the link in bio.
