

— METHOD

**Your past
proposals are a
knowledge base.
Treat them like
one.**

SWIPE ►

— THE PROBLEM

Good writing, buried

Ten years of proposal language sits in a folder tree nobody can search. It is already a knowledge base, it just never got treated like one.

— WHAT TO DO

Curate the winners

Pull the project descriptions, resumes, and approach narratives from the proposals that actually won into one current library.

— WHY IT WORKS

AI needs approved language

Give it a clean library and it drafts from language your reviewers already approved, instead of inventing something generic.

— A E C E N T R I C

Build the library before the next pursuit

One current folder, only the sections that won. That is the housekeeping the tool actually needs from you.

Full breakdown at the link in bio.
