NIST is writing the AI rulebook for critical infrastructure

SWIPE

WHAT IS HAPPENING

A framework in progress, not a regulation yet

NIST opened a concept note in April 2026 for an AI RMF profile on trustworthy AI in critical infrastructure, covering energy, water and transportation. It has convened a Community of Interest and is gathering feedback through a mailing list and Slack channel. No draft date is set.

AECENTRIC

The vocabulary gets written now

Firms that already speak the AI RMF's Govern, Map, Measure, Manage structure will not be retrofitting later. The ones that wait will be translating after the fact.

Full breakdown at the link in bio.
