

— INDUSTRY DATA

**75% of AEC firms
use AI. Win rates
did not move.**

SWIPE ►

— THE NUMBERS

Adoption climbed fast

Unanet's 2026 AEC Inspire report, roughly 300 US AEC leaders, puts AI use at 75 percent, up about 20 points in a year. Unanet sells AI enabled ERP, so read the direction, not the decimal.

— THE NUMBERS

Confidence did not follow

In the same survey, only 29 percent said they had high confidence in the data feeding those tools. Most firms are running AI on top of records they do not fully trust.

— THE NUMBERS

Outcomes stayed flat

Proposal volume went up. Win rates held near 50 percent. More output, same result, which is what happens when a tool speeds up a process nobody redesigned.

Adoption is not the finish line

Using a tool, trusting your data, and changing an outcome are three separate projects. Most firms have only finished the first.
