

— PRACTICE

**Standardize the
prompt, not the
person**

SWIPE ►

— WHAT WORKS

One prompt, not one person's memory

Once a prompt for a repeated task works, save it into a shared library instead of one person's chat history.

— WHAT WORKS

Same logic as your spec master

A detail library and a spec master already work this way: the firm owns the standard, individuals apply it.

— WHAT WORKS

Closes the skill gap

A shared prompt narrows the gap between your best writer and everyone else, which is what adoption at scale requires.

Start with one document

Pick one recurring task, write the prompt once with a senior reviewer, and put it where the whole team can find it.
