INDUSTRY RESEARCH

79 percent of AEC firms plan big AI spend. 8 percent have a roadmap.

SWIPE

THE NUMBERS

Spend is outrunning planning, and outrunning people

Zweig Group's 2026 Information Technology Report of AEC Firms, released October 21, 2026: 79 percent of firms plan significant investments in AI and automation in 2026. Only 6 percent have fully embedded AI into operations, 54 percent are actively exploring it, and 8 percent have a regularly updated, enterprise wide technology roadmap. Software is 36.7 percent of IT budgets, training 0.8 percent. Zweig does not disclose the participant count. Source: Zweig Group, 2026 IT Report of AEC Firms, October 21, 2026.

AECENTRIC

Fund the plan and the people, not just the tool

Those numbers describe one firm: buying AI without a roadmap and without training the people who will use it. We help AEC firms write the roadmap first, size the training line second, and pick the software last. The order matters more than the vendor.
