

— METHOD

**One workflow. One
team. Twelve
weeks. A number
at the end.**

SWIPE ►

— WHY IT WORKS

Pick one workflow

A narrow, well chosen workflow gives you a clean test, not a firm wide experiment.

— WHY IT WORKS

Put one team on it

A single team can commit to a new process without fighting the daily crunch of every project in the office.

— WHY IT WORKS

Run it for twelve weeks

Long enough to get past the learning curve, short enough to keep everyone's attention on the result.

End with a number, not a feeling

If the pilot does not move a metric you already track, you have your answer before you roll it out firm wide.

Full breakdown at the link in bio.
